

EXERCÍCIO

1- Interprete as curvas de $\delta^{13}\text{C}$ e carbono orgânico total (TOC) identificando:

- horizontes onde ocorrem possíveis eventos anóxicos/desóxicos;
- horizontes de possíveis rochas geradoras de petróleo.

Legend: Carbon isotope Chemostratigraphy (from whole-rock carbonate), and total organic carbon values from the three study sections, Truro Island, Eleanor Lake, and Cape Manning (Arctic Canada).
